

HIGH PRESSURE AIR AND GAS RECIPROCATING COMPRESSORS FOR UP TO 6000 PSIG

CompAir's 'High Pressure' air and gas compressors offer a unique range which serve a broad range of industries and applications, both on and offshore. Available as air or water-cooled units, that can be supplied as 'standard' configured sets or as 'custom engineered' packages.

5204 – 5211 Two stage, air-cooled for pressures from 230 to 650 psig and capacities from 3 to 38 cfm.

5307– 5309 Three stage, air-cooled for pressures from 580 to 1200 psig and capacities from 10 to 25 cfm.

5404 – 5409 Three and Four stage, air-cooled for pressure from 1200 to 6000 psig and capacities from 5 to 25 cfm.

5217– 5236 Two stage, water-cooled for pressures from 150 to 580 psig and capacities from 45 to 185 cfm.

5317– 5337 Three stage, water-cooled for pressures from 580 to 1200 psig and capacities from 25 to 95 cfm.

5417 – 5437 Four stage, water-cooled for pressures from 2000 to 6000 psig and capacities from 15 to 95 cfm.

5450– 5470 One to Five stage, air-cooled for pressures from 30 to 6000 psig and capacities from 100 to 2000 cfm.

5280– 5283 Oil-free, Three stage, water-cooled for pressures from 290 to 725 psig and capacities from 285 to 1500 cfm.

Custom Engineered packages for all products built to meet customer's requirements and specifications.

HIGH PRESSURE COMPRESSED AIR AND GAS SOLUTIONS

CompAir is recognized as a world leader in the application and manufacture of compressor systems, dedicated to delivering excellence in innovation design and quality. For over 100 years its reputation has been based on a simply philosophy, find out what the customer wants, then exceed it.

From its 'High Pressure' product range CompAir are able to supply standard set configurations, custom designed packages to meet a particular requirement or a minimum set configuration based on an individual customers needs.

Applications include:

- Autoclave systems
- Offshore compensators
- PET bottle blowing
- Air start systems
- Pressure testing
- Air blast switch gear
- Bio gas compression
- Inert gas systems
- Compressed gas for vehicles
- Coiled Tube drilling
- Pipeline testing
